

En-ROADS Control Panel

Simulator accessible at: en-roads.org

Coal

Discourage or encourage mining coal and burning it in power plants.

Renewables

Encourage or discourage building solar panels, geothermal, and wind turbines.

Transport

Energy Efficiency

Increase or decrease the energy efficiency of vehicles, shipping, air travel, and transportation systems.

Transport

Electrification

Increase or decrease purchases of new electric cars, trucks, buses, trains, and ships.

Nature-Based Carbon Removal

Promote methods that enhance the ability of ecosystems to capture and store carbon dioxide.

Oil

Discourage or encourage drilling, refining, and consuming oil for energy.

Nuclear

Encourage or discourage building nuclear power plants.

Buildings & Industry

Increase or decrease the energy efficiency of buildings, factories, appliances, and other machines.

Buildings & Industry

Increase or decrease the use of electricity in buildings, appliances, motors, and other machines, instead of fuels like oil or gas.

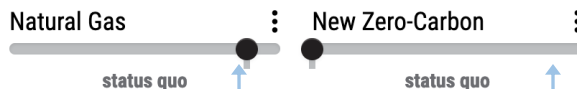

Technological Carbon Removal

Promote methods that use new technologies or heavy industry to capture and store carbon dioxide.

Energy Supply

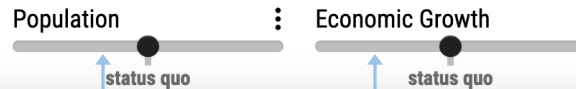

Transport

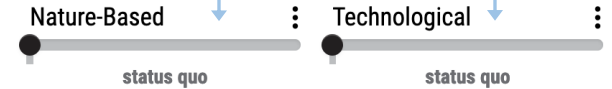

Buildings and Industry

Growth

Carbon Dioxide Removal

Other Sources of Greenhouse Gases

Natural Gas

Discourage or encourage drilling and burning natural gas for energy.

New Zero-Carbon

Discover a brand new, cheap source of electricity that does not emit greenhouse gases.

Economic Growth

Assume higher or lower growth in goods produced and services provided.

Deforestation

Decrease or increase the loss of forests for agricultural and wood product uses.

Bioenergy

Discourage or encourage the use of trees, forest waste and agricultural crops to create energy.

Carbon Price

Set a global carbon price that makes coal, oil, and gas more expensive depending on how much carbon dioxide they release.

Population

Assume higher or lower population growth.

Agricultural Emissions

Encourage practices in farming and alter food habits to decrease methane and nitrous oxide production.

Waste and Leakage

Encourage practices in waste, energy, and industry to limit methane, nitrous oxide, and f-gas emissions
